

SELENIA K Cod. 1142

DESCRIPTION

Synthetic lubricant ideal for the most modern petrol engines. Owing to its unique formula, it warrants high resistance to oxidisation, the utmost protection in "stop & go" driving and outstanding performance whatever the weather.

CHARACTERISTICS

Selenia K is the synthetic lubricant with innovative technology that warrants optimal cold starting and maximum protection also in urban driving. In "stop & go" driving, a standard lubricant suffers an accelerated stress, with the creation of sludges and consequent performance's reduction. Owing to its special additivation, based on dispersant molecules, Selenia K avoids sludges'creation. Its tecnologically advanced formula permits to obtain:

- the most actual international omologation API SM that guarantees maximal resistance to oxidation, extreme protection against deposits, optimal performances at low temperatures
- the exclusive omologation Fiat 9.55535-M2/BZ, for nwe EURO IV Fiat group FIRE engines, thanks to its 5W-40 viscosimetric range with relevant Fuel Economy features.

ADVICE ON USE

As per OEM owner manual.

RECOMMENDED BY

Fiat, Lancia
